Chapagaun, Lalitpur, Nepal | +977 9803535117 | kcsuan424@gmail.com | linkedin.com/in/suan-kc | suankc.com.np

EDUCATION

Bachelor of Science in Computer Science & Information Technology

Expected 2025 (2082 B.S.)

Vedas College, Tribhuvan University

Higher Secondary School (+2, Science)

2020 – 2021 (2077–2078 B.S.)

BajraBarahi Campus

WORK EXPERIENCE

Junior Frontend Developer | Anand Marketing Tech

Jan 2026 – Present

React.js, Redux Toolkit, Node.js, Express.js, JWT, Django REST, PostgreSQL, Redis, Git, Vercel

- Developed Ecommerce-Fashion, a live multi-vendor e-commerce platform with JWT-based MERN auth and role-based dashboards, while resolving critical deployment blockers and mentoring 4+ incoming interns

PROJECTS

Vault — Personal Video/Bookmark Library Platform

2026

Next.js 16 (App Router), TypeScript, Prisma 7, PostgreSQL, NextAuth, Tailwind CSS v4, Zod, OpenAI API

- Building a full-stack Next.js (App Router) platform for saving and organizing content from Instagram, TikTok, YouTube, X, and Facebook, with OpenGraph link scraping and AI-generated summaries/tags via OpenAI GPT-4o-mini
- Designing the schema and auth layer with Prisma 7 + PostgreSQL and NextAuth (email/magic-link), structured across a 5-phase, 32-sprint delivery plan

VideoPlatform App — Fullstack Video Sharing Platform

2026

React 19, Redux Toolkit (RTK Query), Node.js, Express 5, MongoDB, Redis, Cloudinary, JWT, Docker | Live: video-player-platform.vercel.app

- Built a fullstack YouTube-style video platform (MERN) with JWT access/refresh auth, Cloudinary storage, and Redis caching across 7 models and 9 REST controllers, deployed live via Docker Compose
- Implemented RTK Query-based frontend state with automatic 401 token refresh, backed by Vitest/Supertest unit and integration test suites

MomoryBox — Personalized Gift E-Commerce Platform

2026

React 18, Redux Toolkit, Node.js, Express, MongoDB, Prisma/PostgreSQL, Redis, BullMQ, eSewa, Docker

- Built a full-stack MERN e-commerce platform for personalized gift bundles with a guided multi-step checkout and a secondary bookable Experience Truck product line, integrating eSewa payments via custom HMAC-SHA256 verification
- Delivered 70+ REST endpoints across 11 routers with JWT refresh-token rotation and RBAC (user/vendor/admin), using BullMQ + Redis queues for async payment verification and order cleanup, tested with Playwright E2E and Vitest

PMT Frontend — Multi-Role Project Management SaaS

2026

React 19, Vite, Redux Toolkit, React Router v7, Tailwind CSS, Axios

- Developed the frontend for a 6-role project management SaaS platform (Client, PM, OM/CEO, Employee, Accounts, SuperAdmin) spanning ~130 routes, 114 components, and 24 Redux slices
- Built cookie-based JWT auth with silent token refresh, CSRF protection, and granular role/permission guards supporting dynamic custom roles and permission presets

TrelloMCP — Model Context Protocol Server for Trello

2026

Node.js (ESM), Model Context Protocol SDK, Zod, Axios, Python | github.com/Suwaan2/Trello_MCP

- Built an MCP server exposing Trello as 4 callable tools (get_boards, get_cards, create_card, move_card) for AI assistants like Claude Desktop, using the official MCP SDK over stdio transport with Zod-validated schemas
- Created a Trello-to-DOCX reporting pipeline that exports board activity to Markdown and converts it into formatted performance reports via a Python script

TECHNICAL SKILLS

Languages: JavaScript (ES6+), HTML5, CSS3, SQL, Python (scripting)

Frontend: Next.js (App Router), React (18/19), Redux Toolkit, RTK Query, React Router, Vite, Tailwind CSS, Bootstrap, Axios, Responsive Design

Backend: Node.js, Express (4/5), JWT Authentication, RESTful APIs, Model Context Protocol (MCP), Zod

Databases & Caching: MongoDB, Mongoose, PostgreSQL, Prisma, Redis

Infra & Tooling: Docker & Docker Compose, BullMQ, Cloudinary, Git, GitHub, Postman, Vercel, Figma, Canva, Trello

Testing: Vitest, Supertest, Playwright, mongodb-memory-server, Testing Library

LEADERSHIP & ACTIVITIES

- Team Lead — directed UI/UX development for Arma Fashion; coordinated daily standups, design reviews, and GitHub branch management across a 3-person team
- Intern Mentor — trained new interns on Figma, Canva, and Git; structured onboarding sessions covering tool fundamentals and project workflows
- Active participant in CEO strategy meetings, sprint planning, and cross-functional technical debriefs at Anand Marketing Tech
